

HEVO

Building the wireless charging
infrastructure powering our EV future

FORWARD-LOOKING FINANCIAL DISCLOSURE STATEMENT

This document contains forward-looking statements that involve risks and uncertainties. These statements are based on current expectations, estimates, and projections about the industry and markets in which HEVO operates, as well as management's beliefs and assumptions. These forward-looking statements are subject to risks and uncertainties that could cause actual results to differ materially from those projected. HEVO undertakes no obligation to update any forward-looking statements, whether as a result of new information, future events, or otherwise.

HEVO has created the **world's most robust wireless ev charger**, perfectly positioned for the future of autonomous vehicles

Now partnering with major automakers across the US and Europe.

MARKET LEADING TECHNOLOGY

Market-leading price, peak performance, optimized sizing, and verified industry certifications.

PACEPILOT AWARD WINNER (2022)

A distinguished automotive award honoring breakthrough innovation.

17 ISSUED PATENT FAMILIES

Strong IP portfolio with 17 patent families. We have plans to potentially double our IP portfolio in less than two years.

POLYPHASE TECHNOLOGY

8x more power in the same space compared to competitors, co-developed with Oak Ridge National Labs ("ORNL").

TRENDING WIRELESS

Related Press & News

HEVO

HEVO and STEER Tech announce partnership for wireless and autonomous vehicle developments on Ford E-Transit.

ELECTREON

Electreon announces their pending acquisition of wireless competitor InductEV.

PORSCHE

Porsche announces wireless charging will be an option available on their upcoming Porsche Cayenne.

NEXTNRG

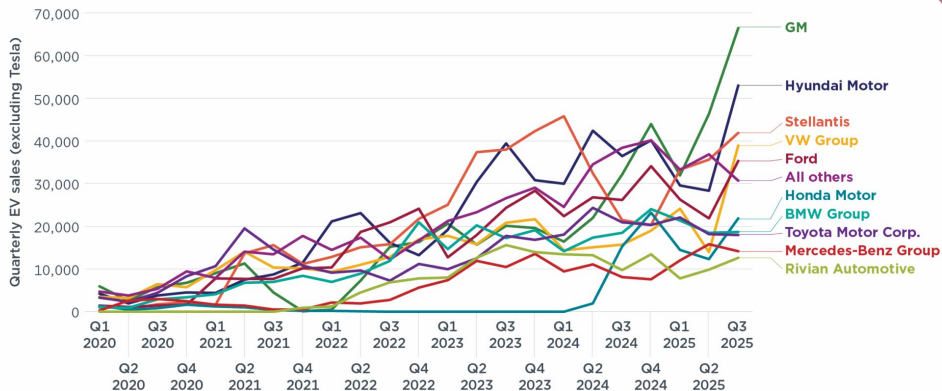

NextNRG announces their partnership with FIU to develop and test wireless EV charging.

GLOBAL EV MARKET AND TRENDS

In Q3 2025, nearly every major automaker set or matched EV sales records.

Most legacy brands posted year-on-year gains above 30%.

Q3 COMPARISON

2025

140%

VW

100%+

GM

45%

Hyundai

2021

275%

VW

1000%+

GM

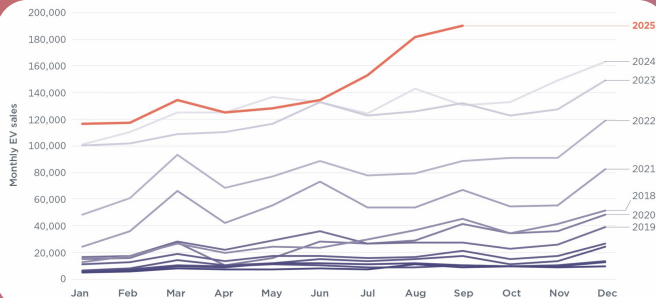

50%

Hyundai

Toyota & BMW: the only brands **not** doubling sales

EV MOMENTUM

More models, lower prices, resilient demand

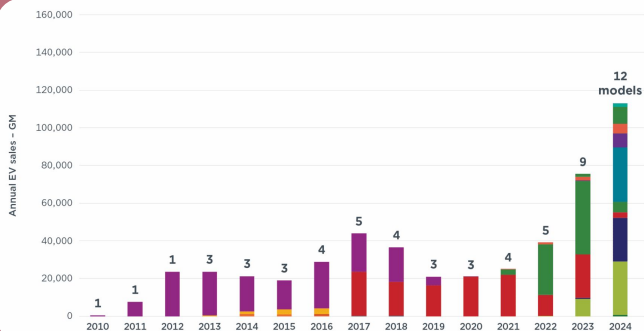

MODEL AVAILABILITY IS THE CATALYST

2015 only VW had 5 plus EV models; by 2025, 10 automakers offer 5 plus and 7 offer 10 plus. EV sales up 12x.

SEGMENTS EXPANDED

2025 lineup = 28 cars, 6 pickups, 79 SUVs vs 19 cars, 0 pickups, 6 SUVs in 2015. Affordability drives volume: 68 percent of BEV sales through Sep 2025 were models starting under \$50k.

DEMAND STAYS STRONG DESPITE INCENTIVE SHIFTS

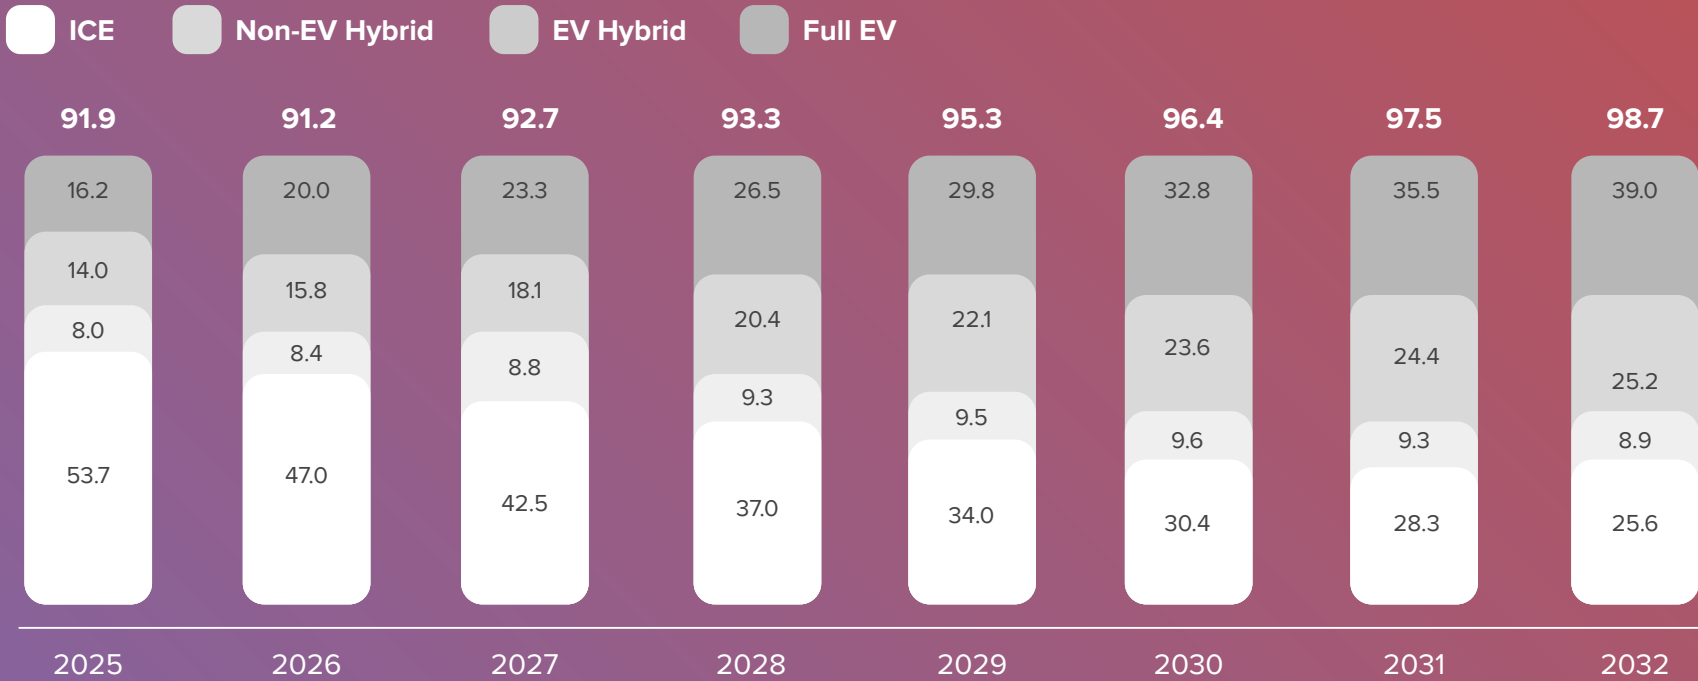

Sep 2025 BEV sales up 40 percent year over year; Oct 2025 down 25 percent vs Oct 2024 after U.S. incentive expiry.

STRATEGIC TAKEAWAY

Sustain affordable model launches and capacity. Backtracking risks share as demand outpaces supply.

Global Powertrain Volume

Vehicle Production by Powertrain

2026 Plan = S&P Nov-25 Units Millions

WHY WIRELESS?

Creating ubiquitous EV charging is critical as we enter the phase of ubiquitous autonomous vehicles...

Because autonomous vehicles aren't really autonomous **if you need a human to charge them.**

Hi

Meet

HEVO

HEVO has developed wireless charging technology that transforms the charging experience into something as simple as parking your car.

No cables, no plugs, no hassle.
Just power flowing effortlessly
from the ground to your vehicle.

Today's charging model copies the gas station. **That's a mistake.**

With wireless charging, Electric Vehicles can be charged **anywhere there's electricity.**

And they should be.

40%

By 2030, EVs are expected to make up over 40% of global car sales

70%

of autonomous ride-hailing fleets are electric

PRODUCT

EV charging as simple as
parking your car

We believe our **Rezonant Hardware** is the dominant wireless charging technology across multiple dimensions

POWER STATION

- 3% peak efficiency loss
- Bi-directional ready
- Gateway and certified energy meter
- SAE J2954 / J2847-6; UL 2750

PEAK EFFICIENCY:

93% Grid-to-battery

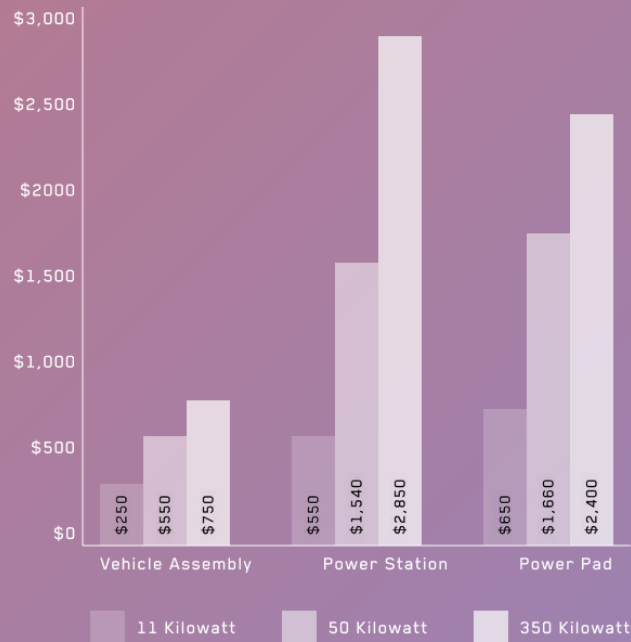

POWER PAD

- 2% peak efficiency loss
- Bi-directional ready
- Object detection
- SAE J2954 / UL 2750

VEHICLE ASSEMBLY

- 2% peak efficiency loss
- Bi-directional ready
- One box or two box assembly
- SAE J2954 / J2847-6;
- Automaker verified

HIGH VOLUME PRICING (100K UNITS)

Journey Software:

Pick A **Location**. Align Your **Car**. **Charge**. It's That Simple.

01

**LOCATION
RESERVATION**

Select a nearby charging location and choose the best route to navigate.

02

**VEHICLE
ALIGNMENT**

As the driver approaches within 25 feet of the selected Power Station, the App automatically displays visual directions to assist the driver with locating the station and vehicle alignment. This feature can also be interfaced with autonomous driving technology.

03

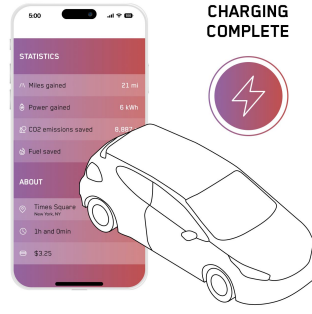

**START
CHARGING**

Charging is as simple as a tap of a button. Remotely start and stop charging anytime, anywhere, while accessing real-time charging data like state-of-charge via the Journey App.

04

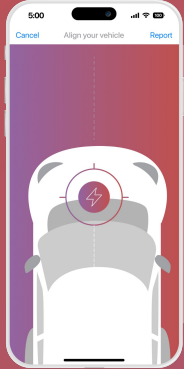

**CHARGING
COMPLETE**

The Journey App informs you when the charging process is complete. Easily use the app to wirelessly pay your bill, monitor your receipts and evaluate your charging statistics on the fly.

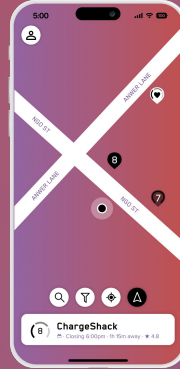

Our Rezonant Hardware and Journey Software Creates

AN ELEVATED EXPERIENCE FOR EV OPERATIONS

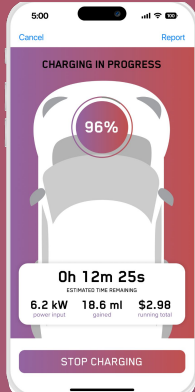

WIRELESS CHARGING

Designed for the future, our technology includes wireless charging parking alignment assistance and features that enhances human driven and autonomous use cases

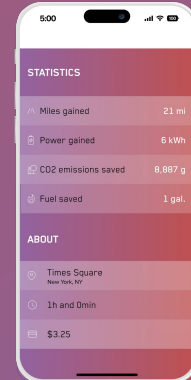

NAVIGATION

EV-charging specific mapping and navigation with route planning, pricing, reservations, filters, and other exclusive features

REMOTE OPERABILITY

Start and stop the charging process remotely while accessing real-time data such as state-of-charge, power input, and charging costs on the go

ACCOUNT MANAGEMENT

Easily add vehicles and payment options, manage charging networks, and access wireless bill pay, receipts, and remote charging statistics

Customers get an intuitive, autonomous experience, and can expect top performance with the HEVO platform.

LOWER COST

Competitive versus plug-in charging with lower maintenance and replacement costs.

EASE-TO-USE

Bi-directional ready and integrates with a mobile app for contactless management.

ACCESSIBILITY

Optimal user experience in bad weather and for those with mobility challenges.

AESTHETICS

Blends into existing Infrastructure and seamlessly integrates with electric vehicles.

SAFETY

Eliminates personal safety concerns associated with handling high-voltage cords.

FUTURE READY

Accelerates autonomous electric vehicle adoption with human-less charging.

The most common question we get is

**HOW DOES HEVO'S WIRELESS
CHARGING PRODUCTS
COMPARE TO OTHER WIRELESS
AND PLUG-IN COMPETITORS?**

HEVO IS **90% CHEAPER** THAN WIRELESS COMPETITORS

and cost-comparable to plug-in systems.

	HEVO	WIRELESS COMPETITORS	PLUG-IN COMPETITORS
VEHICLE PRICE 11 KW BIDIRECTIONAL	\$250	\$2,500+	Standard / Embedded
CHARGER PRICE 11 KW BIDIRECTIONAL	\$1,200	\$5,000+	\$4,000 - \$7,000
AUTOMAKER AGNOSTIC	✓	✗	✗
AUTONOMOUS READY	✓	✗	✗
SOFTWARE PLATFORM	Universally compatible with automaker and charging platforms	Limited to single vehicle platforms or not available	Not wireless and autonomous ready

AND OUR SYSTEM DELIVERS 93% GRID-TO-BATTERY EFFICIENCY

Battery Efficiency, Matching Plug-In Systems

POWER OUTPUT (KW)	TYPICAL USER APPLICATION	PLUG-IN CHARGING TIME	HEVO WIRELESS CHARGING TIME	PLUG-IN EFFICIENCY (GRID TO BATTERY)	HEVO WIRELESS EFFICIENCY (GRID TO BATTERY)
350 kW	Public charging stations, highway corridors	15 - 30 minutes	15 - 30 minutes	Up to 97%	Up to 93%
100 kW	Public charging stations, highway corridors	30 - 60 minutes	30 - 60 minutes	Up to 97%	Up to 93%
50 kW	Public, fleet charging stations, highway corridors	1 - 2 hours	1 - 2 hours	Up to 97%	Up to 93%
11 kW	Home, workplace, fleet charging	4 - 6 hours	4 - 6 hours	Up to 97%	Up to 93%

We are more competitively priced and universally compatible than the competition

TESLA

- Acquired Wiferion in 2023 for \$76M and announced WEVC at the “We, Robot” event in October 2024
- Developing products exclusively for Tesla vehicle platforms

BRUSA

- 11kW wireless supplier for Porsche Cayenne EV, limited to one premium option
- \$8K+ add-on with narrow luxury-segment uptake
- Porsche-only validation with no broader fleet or AV traction

ELECTREON

- Focused on dynamic “in-road” charging; large, industrial EVs
- Limited to pilot projects with no credible commercial model
- Foreign-owned acquirer of InductEV (Nov 2025), materially dependent on subsidies

WITRICITY

- Licensing model with seven-figure fees and high royalties
- Only lab prototypes; no software; non-certified
- Founded in 2007, yet to commercialize any products

HEVO

- Chosen by major automakers for SWaPC (size, weight, performance, cost), including an 11kW package at \$1,500 at OEM volumes
- Focused on scalable passenger, fleet and AV platforms for global deployment, designed for mass market adoption beyond luxury segments
- All hardware and software built in-house with full IP control and additional licensing from Oak Ridge National Labs

BUSINESS MODEL

Built for Scale: Our Dual Revenue
Engine

Low-cost Rezonant wireless charging enables

MULTIPLE HIGH-MARGIN JOURNEY REVENUES

01 CAPTURE AUTOMAKERS WITH INNOVATIVE HARDWARE

Leverage innovative Rezonant hardware and competitive pricing to attract legacy automakers

02 EXPAND AUTOMAKER CUSTOMER BASE W/ LOW-COST PRODUCTION

Manufacture low-cost Rezonant hardware for automakers, consumers, and fleet operators

03 LICENSE JOURNEY SOFTWARE

License Journey software to automakers for seamless infotainment and mobile app integration

04 INTRODUCE CHARGING HOST SUBSCRIPTION PLANS

Implement exclusive Journey subscriptions for charging network operators and bi-directional charging enablement

05 REDUCING PRICING THROUGH HIGHER PRODUCTION DRIVES MASS ADOPTION

Reduce hardware prices to accelerate the transition to Rezonant products and boost high-margin Journey software adoption

06 CONSOLIDATE COMPETITION

Acquire wireless competitors and outdated plug-in charging companies and convert public charging locations to wireless

07 INTRODUCE IN-USER SUBSCRIPTION PLANS

Acquire wireless competitors and outdated plug-in charging companies and convert public charging locations to wireless

08 DRIVE GLOBAL MARKET ADOPTION WITH DYNAMIC CHARGING

Deploy Rezonant dynamic charging lanes integrated with Journey subscription plans and other revenues

CUSTOMER UPGRADE READY

Existing Plug-In Garage Installation

READY-TO-GO

SWAP OUT

Wireless Replacement Installation

INSTALLATION PROCESS

Hang and connect the power station, secure the ground pad with masonry anchors, run the conduit to the ground pad and install the Guardian.

Bi-directional Level 2 Charger: \$1,320

Average Installation Cost: \$1,000

Electrical Requirements: 220V feed and 50 amp breaker (up to *80A)

Bi-directional Level 2 Wireless Charger: \$1,200 (target)

Average Installation Cost: \$400

Electrical Requirements: Utilizes existing 220V 50 amp breaker.

Minimal obsolescence and minimal installation costs to customers.

TEAM

EV leaders and visionaries with hands
on ops experience

OUR TEAM

has both the technical knowledge and industry relationships critical for bringing wireless charging to market at scale.

OUR TEAM COMES FROM LEADERSHIP ROLES AT

TESLA

JEREMY MCCOOL

Founder & CEO

US Army Combat Veteran who launched HEVO during the final year of his MPA at Columbia University.

JON HOLLAND

Finance & Operations

CFO for two EV companies, EV Connect and Qmerit, that were acquired by Schneider. Currently an advisor and investor to several other companies in the e-mobility sector.

ROBERT SKINNER

Commercial & Marketing

Multi-time founder, former Vice President of Digital Strategy and Marketing at FordDirect.

ARVIND KRISHNA

Global Engineering

Former GM Engineer and Global Engineering Manager of Delphi Automotive Parts.

UMER ANWER

Chief Technologist

Umer has led power engineering at HEVO since 2016, bringing over 25 years of experience. He has delivered UL-certified next-generation wireless charging platforms and mission-critical energy storage systems around the world.

OUR BOARD & ADVISORS

We've assembled an advisory board of some of the most respected and visionary leaders in the world of electric vehicles and EV charging.

**A COMBINED 100+
YEARS OF AUTOMOTIVE
EXPERIENCE**

YIFAN TANG

Board Member

Early at Tesla, helping to co-develop the technology for their dual motor AC technology. CTO of multiple EV charging companies, including Volta, which was acquired by Shell.

ROBERT REMENAR

Board Member

Multi-time executive of multiple automotive related companies. Board member of Cooper Standard and Munro & Associates.

ROGER ATKINS

Advisor

Prominent figure in the EV industry, recognized as a LinkedIn Top Voice for EVs "with" 40-years of automotive experience and founder of Electric Vehicles Outlook Ltd, a consultancy that helps clients navigate the evolving landscape of electric, connected, autonomous, and shared vehicles.

JESSE SCHNEIDER

Advisor

Led Specification of Wireless Power Transfer and Autonomous Parking/Charging for BMW 530e. Chairman of the Society of Automotive Engineers Program for Wireless Charging, and responsible for creating SAE J2954, a globally recognized standard that defines how wireless power transfer (WPT) should work for light-duty plug-in and electric vehicles.

HAKIM TLEMSANI

Advisor

A senior automotive leader with deep expertise in SDV, ADAS, and infotainment, bringing extensive P&L experience across EMEA. Proven in driving profitability, large-scale market share growth, and delivering industry-first innovations that support long-term governance, strategy, and scalable growth.

Dynamic Charging

Our vision is to be the universal solution for all automakers, providing best-in-class performance, price, size, and weight.

WE BELIEVE THAT SOLUTION IS HEVO

And we want you to be part of the journey and help us build the future.

”

“If you don’t believe EVs and autonomous vehicles are the future, HEVO is probably not for you.

But if you believe, as we do, that the autonomous electric future is inevitable, I invite you to take a deeper look, because this isn't just another EV charging play, it's an opportunity to invest in what we believe will be the essential infrastructure for the future of global transportation.”
