

ACME ROBOTICS, INC.

Series A Investor Deck - June 2026

Warehouse automation robots with AI-native fleet orchestration.

HQ: Taipei / San Jose. Founded 2022. Team of 34.

CONFIDENTIAL

PROBLEM & SOLUTION

Mid-size 3PL warehouses cannot afford fixed conveyor automation.
Acme deploys autonomous mobile robots (AMR) with per-pick pricing.
Deployment in 3 weeks vs 9 months for fixed automation.

Robots-as-a-Service (RaaS): monthly subscription + usage fee.

TRACTION

FY2025 revenue: US\$3.2M (2.4x YoY)

Deployed fleets: 41 sites, 388 robots (June 2026)

Net revenue retention: 128%

Top-10 customers = 68% of revenue

US market entered 2025Q4; US = 40% of new bookings in 2026H1

UNIT ECONOMICS

Gross margin: 58% (FY2025)

CAC payback: 11 months

Average contract: 24 months, US\$8,400 MRR per site

Robot BOM cost down 31% since 2024 via in-house controller

COMPETITION

Locus Robotics, 6 River (Ocado), Geek+ - enterprise-first, heavy CAPEX

Acme wedge: mid-market 3PL, 3-week deployment, per-pick pricing

No direct competitor in TW/JP mid-market segment today
